

**GONZO FARMS**  
WE GROW DREAMS

Thank you for choosing Gonzo Farms™ Enchanted Nutrient Liquid line. Unlock the strength and simplicity of our hyper-concentrated, fully solubilized bioavailable nutrients at your fingertips. A little goes a long way and you do not need an array of different bottles to make it “work.” Our goal is to make it simple! Our Cal-Mag contains 17 essential Amino Acids to aid in nutrient breakdown right out of the gate. Derived from all natural ingredients and chelated with natural citric acid!

**There is no EDTA found in our nutrients!**

## ENCHANTED LIQUID FEEDING SCHEDULE (MEASUREMENTS BASED ON TSP PER GALLON)

WEEK/TIME	SEED/CLONE	1-2	2-4	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	FLUSH
Lights	24 hrs	18 hrs	18 hrs	12 hrs	12 hrs	12 hrs	12 hrs	12 hrs	12 hrs	12 hrs	12 hrs	12 hrs
Target PPM	400	600	800	1000	1000	1100	1200	1300	1300	1200	1100	100-200
Silica	1/4 tsp	1/2 tsp	1 tsp	1 tsp	1 tsp	1 tsp	1 tsp	1 tsp	1 tsp	1 tsp	1 tsp	-
Cal-Mag	1/4 tsp	1/2 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	3/4 tsp	-
Grow 16-4-4	1 tsp	2 tsp	1 tbsp	2.5 tsp	2 tsp	1 tsp	-	-	-	-	-	-
Bloom 4-20-18				1 tsp	1 1/4 tsp	1 1/2 tsp	2 tsp	2 1/4 tsp	2 1/4 tsp	2 tsp	1 1/2 tsp	-
Zemanya's	1 Tsp Per Can Every Watering											
Raptor Roots	1 Tbsp Per Can Every Watering											

\*SCHEDULE ADJUSTMENTS\* **EXTEND VEGETATIVE CYCLE:** Repeat Week 4.  
**EXTEND FLOWERING CYCLE:** Repeat Week 12.

CONVERSIONS	1/4 tsp = 1.25 mL	1/2 tsp = 2.5 mL	1 tsp = 5 mL = 1/3 Tbsp	2 tsp = 10 mL = 2/3 Tbsp	3 tsp = 15 mL = 1
-------------	-------------------	------------------	-------------------------	--------------------------	-------------------

### MIX DIRECTIONS:

- Add Nutrients in the order they appear on the schedule above (*Silica, Cal-Mag, Grow/Bloom adjust PH, then it is safe to add your beneficials*).
- We don't recommend storing the mixed solution for more than 2-3 days unless aerated and/or agitated.
- Use an air pump, air stones, or circulation pump for the best mixing results.
- Any pH adjustment should be done just prior to feeding your plants.
- Water to runoff (we recommend 15%-25%).
- When introducing a new fertilizer to your program, start slow and gradually increase levels to ensure compatibility and avoid nutrient lock out.
- If you don't notice benefits in your harvest from any product you are using, whether ours or another company's, don't use it.
- Made with love to share with all!

### FOR BEST RESULTS:

- We recommend a feed, feed, flush watering pattern.
- Maintain a pH of 5.6 to 6.8 to prevent nutrient lockout and reduce stress on plants.
- Should plants show signs of stress or color irregularities, flush your system.
- When using coco-based media, we recommend flushing with Cal-Mag as coco cation with release Potassium if your Calcium levels are out of balance causing deficiencies.
- Good vibes, happiness, and compassion!
